

Document title	Information Security Policy
Document ID	SLP-ISMS-003
Version	1.0
Classification	Internal
Owner	ISMS Manager
Approved by	Peter Kováč, Managing Director
Date	30 January 2026

"DISCLAIMER: SLOVPACK s.r.o. is a fictional company created for portfolio purposes. All data, names and scenarios are invented."

1. Purpose This policy establishes the framework for protecting the confidentiality, integrity and availability of SLOVPACK s.r.o. information assets — above all our proprietary production specifications, customer data and the continuity of production and logistics — and demonstrates management's commitment to information security.

2. Scope This policy applies to all employees, contractors and third parties who access SLOVPACK information assets, as defined in the ISMS Scope (SLP-ISMS-002).

3. Policy statements The management of SLOVPACK s.r.o. commits to:

- protecting information assets against unauthorised access, disclosure, modification and destruction;
- complying with applicable legal, regulatory and contractual requirements, including GDPR and customer security requirements;
- managing information security risks through a documented, repeatable risk assessment process;
- setting and reviewing measurable information security objectives;
- providing resources and training necessary for the effective operation of the ISMS
- continually improving the ISMS in line with ISO/IEC 27001:2022, with certification targeted within 18 months.

4. Responsibilities The Managing Director holds ultimate accountability for information security. The ISMS Manager is responsible for the day-to-day operation of the ISMS. All employees are responsible for complying with security policies and reporting security events without delay. This policy supersedes Directive 2/2019 on computer passwords.

5. Consequences of non-compliance Violations may result in disciplinary action in accordance with the Labour Code and internal HR procedures.

6. Review Reviewed at least annually and after significant changes to the business or threat environment.
