#### 2. Checklist

| Requirement                                            | Evidence examined                                                      | Result                     | Notes                                                                                                                                  |
|--------------------------------------------------------|------------------------------------------------------------------------|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| A.5.17 — MFA enforced tenant-wide (Policy SLP-POL-003) | M365 admin portal — Conditional Access policies; sample of 10 accounts | Conform                    | MFA enforced for all 45 users since 18 Mar 2026 (RSK-001 treatment verified)                                                           |
| A.5.18 — Q1 access review of ERP and M365 performed    | Signed access review records, Q1 2026                                  | Conform                    | Review completed 30 Mar; 14 excess ERP permissions removed (recipes access reduced per RSK-004)                                        |
| A.5.16 — Unique identities in all systems              | WMS user list (sample 15 accounts); interview L. Hruška                | Nonconformity (NC-2026-01) | 3 shared WMS accounts still active; licence renegotiation with LogisSoft delayed; passwords no longer displayed on monitor (corrected) |

|                                                                           |                                                                 |                            |                                                                                                                                            |
|---------------------------------------------------------------------------|-----------------------------------------------------------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| A.8.13 — Quarterly restore tests with written report (Policy SLP-POL-004) | Request for Q1 restore test report                              | Nonconformity (NC-2026-02) | No restore test performed or documented; MSP contract addendum signed 10 Apr but first test not yet scheduled                              |
| A.8.13 — Offsite/immutable backup copy                                    | MSP backup architecture description                             | OFI                        | Immutable cloud tier ordered, activation pending; NAS remains permanently connected until then                                             |
| A.5.18 — Same-day deprovisioning at offboarding                           | HR checklist vs. account status, sample of 2 leavers (Feb, Mar) | OFI                        | Checklist used; one account disabled next business day (leaver on Friday afternoon) — process works, timing edge case to clarify in policy |

### 3. Findings

Findings: *Two nonconformities (NC-2026-01 shared WMS accounts; NC-2026-02 missing backup restore tests) and two opportunities for improvement were identified. Corrective actions are recorded in SLP-ISMS-013 with 30-day deadlines.*

### 4. Conclusion

Conclusion: *Audited controls are partially effective. Verified progress on MFA and access reviews demonstrates a positive implementation trajectory.*
